

## Lesson 5

Years	Duration
0-8	1.5 hours

# Stormwater and wastewater

Class-based lesson

## Your students will learn about:

- The difference between stormwater and wastewater
- What happens when the wrong things go down the drain
- What they can do at home and school to improve their local environment

This lesson is a hands-on, collaborative outdoor activity where your students create a terrain with lakes and rivers, to consolidate what they learn in class about the journey water makes from lakes, down rivers and smaller waterways to the sea.

## Book the lesson

To register interest please email [education@water.co.nz](mailto:education@water.co.nz)

For more information visit [watercare.co.nz/water-education](http://watercare.co.nz/water-education)

## What you will need to provide for the lesson:

- Whiteboard and marker pens
- Access to a stormwater drain (with a water tap nearby)
- Laptop and data projector to show a PowerPoint presentation
